Now, the spokesman said, so that any additional load will mean the cancellation of Pullman reservations and some "bumping" of civilians from berths and compartments while en route.

The new ODT order gives the railroads full legal authority to cancel reservations, space and tickets when necessary to make room for casualties. It authorizes the railroads to make passengers vacate berths or other space already assigned, to forbid any but invalid troops and their attendants to board trains, and even to cancel regular intercity train schedules when the trains are needed for casualties.

## GOP Foreign Policy Against "World State"

Chicago—(AP)—Beating down an attempt by Gov. Sumner Sewall of Maine to "simplify" the language—and eliminating some phrasing criticized by Wendell L. Willkie—the Republican platform committee endorsed today a foreign policy plank opposing a "world state" and proposing to maintain security by "peace forces."

Sewall told reporters that he had moved unsuccessfully in the meeting to eliminate the final phrase of an assertion that "we shall seek to achieve such (peace) aims through organized international cooperation and not by joining a world state."

Willkie, the 1940 presidential nominee, and a group of 15 Republican governors which included Sewall, had complained that this and the "peace forces" provision were ambiguous. Willkie charged that the plank might mean "no international organization at all."

Rejecting all these protests, the committee released immediately about one-third of a platform—expected to run nearly 3,500 words in length—which it planned to lay before the convention at this afternoon's session (4 p. m. CWT).

Because the platform drafters appeared to have ignored largely the complaints of Willkie and the governors, there remained the imminent possibility of a floor fight on the foreign policy plank.
